

30-year-old career change to solar container electrical engineer

<div class="df_qntext">How many solar jobs are there in 2023?

The solar energy sector is experiencing unprecedented growth, with over 7.1 million jobs in solar PV alone as of 2023. For professionals considering a career shift into renewable energy, solar offers pathways across R&D, manufacturing, project development, and operations.

<div class="df_qntext">How many solar jobs are there?

In the early 2000s, solar jobs were largely niche, limited to a few specialised roles in research & development and small-scale installations. According to IRENA 2024 report, the renewable energy industry now supports over 16.2 million jobs worldwide, with over 7 million jobs in solar PV and heating/cooling alone.

<div class="df_qntext">Should you make a career change at 30?

A career change at 30 might stir feelings of uncertainty. However, this article has provided a clear roadmap, guiding you from the initial contemplation stage through to the job search process. When strategically planned, such a shift can lead to a fulfilling path of professional growth.

<div class="df_qntext">Is engineering a job for life?

Engineering is often perceived as a job for life; a career which you enter into at a young age (such as through apprenticeships, internships or simply straight out of school) and carry on with for years, maybe even decades. Of course, this means that career fatigue can set in very easily, especially for such physically demanding roles.

<div class="df_qntext">How often do you change jobs in your 30s?

In reality, life is far more flexible, and changing your career in your 30s isn't just common--it's frequently transformative. According to 2023 statistics from the Bureau of Labor Statistics (BLS), Americans between the age of 25 and 34 change jobs an average of 2.4 times.

<div class="df_qntext">How do I get a career change job for engineers?

Begin applying to career change jobs for engineers Job search sites, company websites and networking through personal connections will bring opportunities to your attention. An up-to-date CV and personalised cover letters are essential for each role.

As for finding a job, I have been working in the aerospace industry, first as an A& P mechanic, now as a technical individual contributor for the past 13 years, and I make a good deal more than I would as an ...
