

Air solar container blasting

<div class="df_qntext">What is a transportable container blast room?

The transportable container blast room adopts the filter cartridge type dust collector, which fully meets the environmental protection requirements. 1. No installation required. Our blast room equipment can work after connecting to the power and air supply. 2.

<div class="df_qntext">What makes airblast a bespoke blast room?

For a bespoke facility, Airblast Limited's modular system offers more flexibility than a containerised blast room. It's made from a standard 2mm galvanised steel-formed panel. Blast room design from the leaders in blast and spray innovation. Sound attenuated blast booths improve health & safety and reduce noise.

<div class="df_qntext">Who makes airblast blast rooms?

Airblast Limited designs, manufactures and installs Blast Rooms for a variety of market sectors from Aerospace, Oil & Gas, and Marine to Road Haulage, Rail, and Wind Power. Weatherproof blast rooms utilise the structural steel of a portal frame building to replace the blue 'diaphragm' plates featured on modular blast rooms.

<div class="df_qntext">What is a self contained portable blast room?

The container is modified with a bulkhead to provide two rooms, the blast room and a service room. The self contained portable blast room houses a host of equipment simply requiring compressed air and electrical connections. The units are designed for internal / covered locations. If being positioned outside, a suitable covering is required.

<div class="df_qntext">What is a blast container?

The Blast Container is a bundle blaster which is built into a container. This makes the bundle blaster easy to transport and possible to use on your desired location. Waste water and debris is collected, so there is no pollution of the direct environment.

<div class="df_qntext">Why should you choose a dust collection module for a small blast room?

Despite its compact size, it is powerful enough to match the air speeds of our external system, ensuring a safe and comfortable blasting environment. This module has proved so successful that we are now offering it as a cost-effective dust collection solution for smaller blast rooms.

Working along the same principle as our external filter cartridge technology, this compact solution is able to match the air speeds of the external system. This allows us to keep dust particles suspended in the ...
