

Berlin water storage energy project factory operation telephone

<div class="df_qntext">How many people do you supply water to in Berlin?

We supply drinking water to 3.5 million Berlin citizens and nearly 100,000 inhabitants in the surrounding region. In addition to this, we take care of the environmentally sound disposal and treatment of wastewater in Berlin and for 500,000 people in the surrounding region.

<div class="df_qntext">Is Berlin drinking water ready?

The Berlin drinking water is ready. Without any added chemicals. Berlin's drinking water is an all natural product. That is also why it is so hard and rich in minerals, just as nature would have it. Used water is wastewater. We look after that too.

<div class="df_qntext">Why is Berlin's drinking water so hard?

Berlin's drinking water is an all natural product. That is also why it is so hard and rich in minerals, just as nature would have it. Used water is wastewater. We look after that too. It is collected in the sewers and pumped to the sewage treatment plants, where it is purified according to the latest standards.

<div class="df_qntext">What is Germany's largest heat storage tank?

With a height of 45 meters, a diameter of 43 meters and a capacity of 56 million liters, Germany's largest heat storage tank will store district heating water at a temperature of 98 degrees Celsius. "Heat storage is an important component regarding flexibility in the grid, which is needed to feed in more and more renewable energies.

Air heat pumps cover the remaining 15 per cent of heating energy. The electricity required for operation is 100 per cent green - either generated locally or purchased from wind and ...
