

Brazil recycles solar container fluid

<div class="df_qntext">Why is recycling so important in Brazil?

There is also the lack of measures that can really educate the population about the importance of recycling. Recycling in Brazil has been a very informal activity, performed mainly by waste pickers, who are extremely poor people who see recycling as a way of earning some extra money.

<div class="df_qntext">Does Brazil have a recycling program?

Brazil has no structured municipal recycling programs. Only 6.4% of Brazilian municipalities have official waste recycling programs and more than 70% of Brazilians do not separate their recyclable materials into proper bins.

<div class="df_qntext">How will Brazil's recycling industry change in the next decade?

Brazil has set ambitious plans for its recycling sector in the next decade, involving a significant increase in the country's overall recycling rate and a doubling of the industry's current revenue.

<div class="df_qntext">Are Brazil's recycling prospects cloudy?

Roger Amarante, head of the Brazil National Recycling Institute, tells Recycling International that, while the current situation in the Brazil recycling sector is generally stable, further prospects are cloudy. Amarante is unhappy with the current volumes of state support to the industry.

<div class="df_qntext">What are the barriers to recycling in Brazil?

The main barrier for recycling in Brazil is the lack of infrastructure: only 62% of the Brazilian population have access to regular garbage collection and the collection of recyclable material is very rare. There is also the lack of measures that can really educate the population about the importance of recycling.

<div class="df_qntext">How many Brazilian cities have no waste collection & recycling initiatives?

Abrelpe's data indicates that 26% of Brazilian cities have no waste collection or recycling initiatives. Only the southern and south-eastern regions have collection and recycling initiatives in more than 90% of their municipalities.
