

# Can individuals invest in overseas cloud storage

<div class="df\_qntext">What makes a good offshore cloud storage provider?

The best offshore cloud storage should have a good privacy policy and offshore data servers. In addition to privacy, security is another heavily weighted consideration. These five storage providers have cloud servers outside the U.S., although a few also have servers in America.

<div class="df\_qntext">Should I switch to an offshore cloud storage provider?

If your cloud service is in a country with questionable privacy laws, changing to an offshore cloud storage provider is something to consider. Several countries, including the U.S., have privacy laws that favor the government more than the individual, often in the name of national security.

<div class="df\_qntext">Why should you choose a European cloud storage provider?

One reason to choose a European cloud storage provider is to take advantage of privacy laws that govern where your data lives. Data residency guarantees ensure your information physically remains within EU borders, providing legal protection under European privacy frameworks even when accessed from elsewhere.

<div class="df\_qntext">Is cloud storage safe outside the US?

The U.S. and a few other countries have privacy laws that favor the government, which may leave your cloud storage data exposed to prying eyes. Fortunately, offshore cloud storage providers put user privacy front and center. In this article, we look at the five best options for cloud storage outside the U.S.

<div class="df\_qntext">Do cloud storage providers have a privacy policy?

In addition to privacy, security is another heavily weighted consideration. These five storage providers have cloud servers outside the U.S., although a few also have servers in America. Additionally, since each cloud storage provider resides in another country, U.S. privacy laws do not apply to them.

<div class="df\_qntext">What are the best European cloud storage providers?

Our list of the best European cloud storage providers includes pCloud, Icedrive, Internxt, Tresorit and MEGA. pCloud gets top marks as an excellent cloud service, including the best overall for music, and it makes our list as the best European cloud storage, with its recently opened data region in Luxembourg.
