<div class="df\_qntext">What are European charging infrastructure regulations?

The current European charging infrastructure regulations set minimum requirements for charging stations. In the near future,these will include smart charging,which is in turn enabled by digital communication standards.

<div class="df\_qntext">How are public charging stations viewed?

involved in how public charging stations are viewed. Grid operators are primarily concern d with safety and the impact on the electrical grid. Meanwhile, governments look toward the requ rements of EV drivers and organization of the space. Then there are operating companies, factories and other market players who

<div class="df\_qntext">Are smart charging standards obsolete?

Smart charging standards are at different stages of development but are not yet available for any charging stations built today. However,infrastructure not compatible with future standards risks becoming obsoletebefore the end of its expected lifetime.
