<div class="df_qntext">What are the benchmarks for PV & energy storage systems?

The benchmarks are bottom-up cost estimates of all major inputs to typical PV and energy storage system configurations and installation practices. Bottom-up costs are based on national averages and do not necessarily represent typical costs in all local markets.

<div class="df_qntext">How much does a solar system cost in 2022?

System prices of \$1.99/W DC in 2022 and \$1.78/W DC in 2023 are based on bottom-up benchmark analysis reported by (Ramasamy et al., 2022), with market adjustments for 2023 from (Ramasamy et al., 2023).

<div class="df_qntext">What is commercial PV pricing & capacity?

Commercial PV pricing and capacities are quoted in kW DC (i.e., module rated capacity) unlike other generation technologies (including utility-scale PV), which are quoted in kW AC. This is because kW DC is the unit that most of the PV industry uses.
