<div class="df_qntext">What is a modular microgrid?

In the ongoing effort to lower the cost of microgrid deployment,one concept that continues to evolve is that of the modular microgrid,best expressed in a system that can fit inside a single shipping container. It's not a new idea.

<div class="df_qntext">Who develops container microgrids?

Another developer of container microgrids is Arizona State University (ASU) Associate Professor Dr. Nathan Johnson,who heads ASU's Laboratory for Energy And Power Solutions. Before beginning his faculty position at ASU,Johnson was an NSF Postdoctoral Fellow at HOMER Energy.

<div class="df_qntext">How can a microgrid make energy consumption more sustainable?

To make energy consumption more sustainable,the implementation of various microgrid controlsis used. These special control actions are named as "Energy Management System" of the microgrid,which is a set of integrated commanding functions implemented in the network [8,9].
