

Electric vehicle solar container project management engineer

The aim of the "Autonomous Solar Electric Vehicle" project is the investigation and realization of a reduced scale autonomous solar electrical vehicle. The project ...

We design, install and maintain solutions that contribute to a greener future. Our focus is on quality, reliability and innovation. With a motivated team, we realise diverse projects within the energy sector. ...

The Project Manager is responsible for ensuring that larger battery storage "turnkey" projects provided by Tesla Energy are procured, built and commissioned to a high degree of quality and in an efficient, ...

The main objective of the project is to use outgoing solar energy as a source to run a two wheeled motor bike. This project aims to create a pollution free solar powered vehicle. The main aim of this project is ...

For this purpose, a software platform named SPEM - Solar Parking of Electric vehicles Management - including system architecture and algorithms, has been developed on top of a ...

Discover our solar container power solutions offering reliable, modular, and off-grid renewable energy. Ideal for remote sites, disaster recovery, and industrial applications. Enhance your ...

The authors have proposed a photovoltaic (PV) integrated electric vehicle (EV) instead of conventional EV with separate PV/grid/hybrid charging station. As starters, the goal is to execute ...

The Electric Vehicle Project Manager will support programs and technical services across BV divisions related to the electric vehicle (EV) market. This position is responsible for managing the overall ...

An emerging technology for enhancing energy security is the solar Photovoltaic (PV) connected Electric Vehicle (EV) charging station. However, the sporadic nature of PV causes grid ...

By cooperating with European leading suppliers, the R& D department continuously upgrades design and engineering abilities for excellent product performance and quality. As R& D Engineer, you will do ...
