

<div class="df_qntext">How does customs clearance work?

Customs clearance is the process of clearing goods through customs when they are commercially imported into or exported from the EU. Here's a detailed summary of how it works, including how goods must be declared and what freight forwarders should consider when importing or exporting goods.

<div class="df_qntext">What is the EU import Procedure section?

This section is aimed at EU importers. It provides detailed information on EU import procedures, including topics such as registering as an economic operator (EORI number), the various documents you need to complete and links to sector and country specific requirements.

<div class="df_qntext">How are customs declarations standardized in the EU?

Customs declarations are standardized throughout the EU. As a general rule, the declaration must be submitted to the customs office of the country where the goods arrive. For example, if a container reaches Rotterdam, its contents are declared at the Dutch customs office.

<div class="df_qntext">When does customs clearance end?

Customs clearance ends when your declaration is accepted and duties paid. Your goods then enter free circulation in the EU. This milestone gives your business full access to transport. You can use it to sell in European markets. The process is complete, and new opportunities await.

<div class="df_qntext">What is centralized clearance?

Centralized clearance is a customs clearance process that requires approval and is only available to companies authorized for simplified procedures. These companies must have the status of an Authorized Economic Operator (AEO). The Union Customs Code (UCC) stipulates an electronic customs declaration for this process.

<div class="df_qntext">What is a customs declaration?

A customs declaration is the document on which the imported or exported goods are specified. It can be prepared by the owner of the goods or an authorized person, such as a logistics or customs service provider. Customs declarations are standardized throughout the EU.
