

## Forklift solar container valve

<div class="df\_qntext">What attachments does a forklift have?

This forklift offers a wide variety of attachments to fit your material handling needs, including 3-spool main control valve (lift, tilt, attachment), and 4-point top pick twistlock attachments as well as a 2-point side post hook attachment for double stacking of empty containers.

<div class="df\_qntext">How does a forklift work?

The arm length of the forklift mechanical arm is required to lift the modules from the short side of the pallet with a fork (the height of the forklift is required to be  $\leq 40$ mm from the ground), and the modules are moved out slowly. If the modules are unloaded from long side forks, fuel oil forklifts are needed to unload.

<div class="df\_qntext">Can You charge an electric empty container handler with a forklift?

Once fully charged, Lead-Acid batteries can be re-fitted to your electric empty container handler using a forklift. Lead Acid batteries feature: Charging time - 8 hours full charge. Lithium-Ion batteries are permanently fitted to your electric empty container handler and can be charged just like you would charge an electric car.

<div class="df\_qntext">Can you use a forklift on a pallet?

ALWAYS insert the fork from the short side of the pallet, as long as it is safe to do so. Impacts from the backrest are the leading cause of module damage and moving modules from the short side avoids contact with this area. Use the right-sized forklift forks based on the pallet size. Do NOT use oversized forks.

<div class="df\_qntext">Where should a module package be located in a forklift?

One side of the module package should be close to the retainer(Figure1); When using a forklift to move palletized packing boxes to the operation area, the forklift shall be slowly and steadily lifted and put down gently during loading and unloading, and the modules shall avoid turbulence and violent vibration during transportation.

<div class="df\_qntext">How do you store pallets in a forklift?

Use forklifts with a backrest greater than 48 inches. Do NOT press the forklift backrest into the cardboard. Prior to unpacking, store pallets in a covered, dry and ventilated location. When unpacking and staging, place pallets in a flat, open and dry location. While unpacking, position pallets next to a solid, self-standing support structure.
