

How many employees do domestic solar container companies have

<div class="df_qntext">How many people work in solar power?

Around 7 million of those employees work for companies engaged in solar photovoltaics, the conversion of solar power to electricity. Solar industries have the strongest showing in the statistic, with another 680,000 people employed in solar power directly converted to heating or cooling.

<div class="df_qntext">How many solar companies are there?

Over 10,000 solar companies across U.S. states are responsible for this employment, with workers with a wide variety of backgrounds and job functions supporting the solar industry. In addition, the industry generated over \$70 billion of private investment in the American economy in 2024.

<div class="df_qntext">How many solar jobs are there?

Additionally, 33,473 solar jobs were in the manufacturing sector, which is expected to expand as more domestic manufacturing plants for solar panels, cells and wafers start operations. Initially, the growth in solar jobs closely mirrored the increase in installed capacity until 2016.

<div class="df_qntext">How many solar energy workers are there in 2024?

In the first quarter of 2024, the solar sector accounted for 75% of all newly added electricity-generating capacity. The number of Americans employed in the U.S. solar energy industry more than doubled in a period of 12 years, growing to 263,882 solar energy workers as of December 2022.

<div class="df_qntext">What percentage of solar workers are Asian?

Americans of Asian descent make up 9% of solar employees, surpassing their 7% share of the overall U.S. workforce. Workers identifying as Hispanic or Latino account for 22% of solar industry employees, higher than their 19% contribution to the general workforce.

<div class="df_qntext">Why are solar companies pursuing a new business model?

Still, increasing electricity bills and power outages have led to sustained interest in residential solar, and companies are expected to pursue new state markets and adapt their business models to offer solar leasing options, driving growth in later years.
