

Japan brazil new port solar container

<div class="df_qntext">Could hub ports triple the transshipment of containers in Brazil?

A groundbreaking study indicates that hub ports could potentially triple the transshipment of containers in Brazil and reduce maritime transport costs. Developed by A&M Infra, Navarro Prado Advogados, and APM Terminals, the white paper addresses the benefits of hub ports for Brazilian foreign trade and the national economy.

<div class="df_qntext">Will Brazil build a new port of Santos terminal?

The Brazilian government has been trying to implement the project since 2019, during the administration of Jair Bolsonaro. With a growing container business at the Port of Santos, the new terminal would add much-needed capacity.

<div class="df_qntext">Does Brazil need a container port in 2024?

Container throughput has doubled since 2010, yet investment in ports remains inadequate. Brazil allocated just 2.2% of GDP to infrastructure in 2024--half the 4.3% needed to meet projected demand. At Santos, which handles 60% of Brazil's containerized cargo, terminals operated at 100% capacity for most of 2024, exacerbating delays.

<div class="df_qntext">Which ports could become hubs in Brazil?

According to the study, in addition to the Port of Santos (SP) - favoured for its proximity to the country's largest production and consumption centre and its diversity of long-haul services - other ports that could also become hubs in Brazil include: Paranaguá (SC), Itapoa (SC), the Itajaí-Navegantes complex (SC), Suape (PE), and Pecém (CE).

<div class="df_qntext">Will the port of Santos become a Brazilian hub?

According to Marcos Pinto, managing partner at A&M Infra consultancy, the Port of Santos (SP) is a natural candidate and the leading favourite to become a Brazilian hub.

<div class="df_qntext">Are Brazil's ports at a critical juncture?

Brazil's ports are at a critical juncture. As the country's trade volumes surge, driven largely by agribusiness exports, infrastructure bottlenecks and operational inefficiencies have reached a tipping point. The Port of Santos, Latin America's busiest hub, exemplifies both the opportunities and challenges facing Brazil's maritime sector.

Other ports in Brazil include Fortaleza Port, Itapoa Port, Manaus Port, Recife Port, Salvador Port, and Vitoria Port. Each of these ports plays a significant role in Brazil's maritime trade, handling various ...

The port will handle different types of cargoes, such as crude oil & gas, energy, offshore supply, grains, fertilizers, ores, containers, and general cargo, with a potential to handle 220 ...
