<div class="df_qntext">What is Poland's energy policy until 2040?

For this reason, on March 29, 2022, the Council of Ministers adopted the principles for the update of the "Poland's Energy Policy until 2040" (PEP2040), which are aimed at strengthening energy security and independence in the context of the new situation.

<div class="df_qntext">When can I use the photovoltaic discount system in Poland?

Owners of photovoltaic installations installed in Poland before March 31, 2022, can still benefit from the previous discount system. Those who installed panels after this date could use the old system until July 1, 2024.

<div class="df_qntext">Why should you invest in photovoltaic panels in Poland?

Photovoltaics, like heat pumps, have become one of the fastest-growing energy sectors in Poland. Investing in photovoltaic panels is not only a way to save money but also to increase independence from rising electricity prices. By generating electricity from renewable energy sources, you can protect the environment while reducing your bills.

<div class="df_qntext">Are there changes in the regulations regarding photovoltaic installations?

However, in recent years, there have been significant changes in the regulations regarding the settlement of energy from photovoltaic installations. After the revolution in 2022, when Poland introduced the net-billing system, further modifications are planned for 2024.

<div class="df_qntext">What are the settlement rules for business photovoltaic energy?

The settlement rules for business photovoltaic energy differ depending on the installation size. Companies with micro-systems up to 150 kW settle energy surpluses similarly to private consumers - surplus energy is sold at the average monthly energy price on the Energy Commodity Exchange.

<div class="df_qntext">What happened in Poland's political and regulatory space?

The last several months in the Polish political and regulatory space have been eventful from the perspective of BESS and energy markets. Only this week brought the creation of the new Ministry of Energy .

Warsaw, Poland - October 22, 2024 - With Poland emerging as Europe's fourth-largest solar market, the country's renewable energy sector is at a pivotal moment. The fifth edition of the Solarplaza ...
