

# Latest regulations on thailand s solar container subsidy policy

<div class="df\_qntext">What is Thailand's new solar policy?

As industry, developers and policymakers collaborate to implement this policy effectively, the future of solar energy in Thailand looks brighter than ever. Thailand's new policy unlocks rooftop solar for businesses—cutting costs, boosting energy independence and driving sustainability.

<div class="df\_qntext">Why is Thailand removing the requirement for rooftop solar?

By removing this requirement, the Ministry of Industry has effectively lowered the barriers for businesses to adopt large-scale rooftop solar systems. This move aligns with Thailand's renewable energy ambitions, including the goal of achieving 30% renewable energy in the national energy mix by 2037 and carbon neutrality by 2050.

<div class="df\_qntext">What are Thailand's energy policies?

Thailand's energy policies are prepared and proposed by the Ministry of Energy (MoE) through the Energy Policy and Planning Office, which also includes the National Energy Policy Council (NEPC). The Energy Regulatory Commission regulates policies related to electric power and natural gas transmission.

<div class="df\_qntext">How will regulatory changes affect Thailand's solar industry?

Companies that integrate renewable energy into their operations will find themselves better positioned to compete in global markets. The regulatory change is a clear boon for Thailand's solar sector, paving the way for accelerated growth in rooftop solar installations.

<div class="df\_qntext">Why is Thailand exempting rooftop solar installations from factory licence requirements?

Thailand's decision to exempt rooftop solar installations exceeding 1 MW from factory licence requirements removes significant barriers to solar adoption, enabling businesses to save costs, achieve energy independence and contribute to environmental goals.

<div class="df\_qntext">Why is Thailand enacting the Ministerial Regulation?

The enactment of the Ministerial Regulation marks a significant step towards simplifying the regulatory process for solar rooftop installations in Thailand, encouraging more sustainable energy projects throughout the country.

For example, the New York New Jersey Port Authority provided a series of subsidy policies for multimodal transport, including a subsidy of \$25 for each heavy container, a subsidy of ...

There will be a full feed-in tariff granted for the duration of 25 years starting from the scheduled commercial operation date (SCOD). According to the regulation, the SCOD for all rooftop systems ...
