The genuine Rolex caliber 3235 is a relatively new movement with an astonishing 72 hour power reserve. Just like the genuine 3135 the genuine 3235 doesn't have a regulation arm on the balance ...

We could say that the similarity is more than 95%. It is reasonable to be called the best 3235 clone movement at the moment. The most important thing is that the power reserve has reached nearly 70 ...

Key Features of the Rolex 3235 Movement Chronergy Escapement: One of the standout features of the 3235 movement is the Chronergy escapement, which enhances the movement's efficiency. This ...

Personally I'm going to wait to see how this "new" SH3235 stacks up, but I think it'll be fine - Clean won't release a movement with a high repair rate since it eats their profits. At this point ...

Hello everyone, this is Steve, we have already dismantled the 3135 and 4130 movements, of course the 3235 movement would not be missed, so here it is. We have dismantled the genuine 3235 movement ...

Personally I'm going to wait to see how this "new" SH3235 stacks up, but I think it'll be fine - Clean won't release a movement with a high repair rate since it eats their profits.

My serviced movement with the Asian Main Spring has a power reserve of almost 70 hours (guess it stopped running after 68 hrs.) and it keeps its time at ~ +/- 3 sec./day.

The 3135 movement offers a power reserve of 48 hours, while the 3235 increases this value to 70 hours. This enhancement means that wearers can enjoy a longer running time without ...

Equipped with a larger tension spring, this movement has an extended power reserve of 72 hours and beats at 28,800 vibrations per second. In addition, the Calibre 4130 was also the first time Rolex ...
