<div class="df\_qntext">What if you dig too far under a solar excavator?

Digging too far underneath the excavator if soil conditions are wet, loose or unstable can collapse ground support, which could cause injury and/or equipment damage. 2.6m (8.5 ft) ARM 3.2m (10.5 ft) ARM 4.0m (13.1 ft) ARM AUS0520L Figure 3 S0202110K Specifications for Solar 340LC-V Page 8...

<div class="df\_qntext">What happens if the excavator is used in the same operating configuration?

If the excavator is used in the same operating configuration day in and day out (for example, with the travel motors always under the counterweight, or with the attachment over one side of the machine more than the other), the bearing's service life could be reduced.

<div class="df\_qntext">How high can a mini excavator clean a table?

A mini excavator can clean tables up to six meters high with the Rapid cleaning solution. This is possible because the flexible system can be rotated 180 degrees and continues cleaning in the opposite direction, ensuring maximum efficiency.

<div class="df\_qntext">Why should you use a solar power machine?

Ensure your machines are ready to work. Minimize expensive service calls that put a stop to your day. Triple your machine's battery life. Topping up batteries with solar extends battery life from months to years. Batteries charge anytime it's light out, eliminating the need to jump after periods of inactivity. Durable and worksite tested, Go Power!

<div class="df\_qntext">How do you protect a bucket from high-voltage power lines?

Page 32 AVOID HIGH-VOLTAGE CABLES Serious injury or death can result from contact or proximity to high-voltage electric lines. The bucket does not have to make physical contact with power lines for current to be transmitted. Use a spotter and hand signals to stay away from power lines not clearly visible to the operator.

<div class="df\_qntext">How does a solar panel controller work?

Controllers regulate the flow of current from the solar panels to the batteries, simultaneously ensuring maximum charge efficiency and also preventing overcharging. Fully customizable, industrial-grade wiring harnesses include: plug and play connectivity, protective shielding and fusing to keep your system safety compliant.
