

<div class="df_qntext">How can Mozambique achieve climate-resilient development?

This report identifies options for implementing climate-resilient development within a fiscally constrained framework. It highlights the need for Mozambique to prioritize policies and investments that enhance its resilience to climate change, manage transition risks, and take advantage of global low-carbon trends.

<div class="df_qntext">How does the CCDR impact development in Mozambique?

In addition, the CCDR offers a set of four high-impact priorities to boost climate adaptation, build resilience, and foster low-carbon growth while improving development outcomes: leveraging Mozambique's energy and mineral wealth. Climate change will compound Mozambique's development challenges.

<div class="df_qntext">Will poverty increase in Mozambique by 2050?

By 2050, under the worst-case "hot" climate projection scenario, Mozambique's poverty level will increase by 5%, pushing 1.6 million additional people into poverty. If no significant structural transformation takes place, inequality, as measured by the Gini coefficient, will hardly change by 2050 under all the climate scenarios analyzed.
