

National development solar container business park price entity forecast latest market

<div class="df_qntext">How big is the solar container market?

The solar container market is projected to grow from USD 0.29 billion in 2025 to USD 0.83 billion by 2030, at a CAGR of 23.8%. This growth is fueled by the increasing need for reliable off-grid power supply and the adoption of portable renewable energy systems, coupled with government initiatives promoting clean energy.

<div class="df_qntext">How much solar capacity did the residential segment install in Q1 2025?

Utility-scale projects dominated installations in both states. In Q1 2025, the residential segment installed 1,106 MWdc of solar capacity, declining 13% year-over-year and 4% quarter-over-quarter. High interest rates and economic uncertainty continued to suppress demand.

<div class="df_qntext">How will New York's solar market perform in 2025?

New volumes in New York also declined slightly, even as the state continues to represent 52% of the total market. We expect the national community solar market to contract 22% this year, following a particularly strong 2024 for the segment. However, installed capacity in 2025 will still exceed 2023 volumes, reaching approximately 1.5 GWdc.

<div class="df_qntext">How much solar capacity did the US solar industry install in Q1 2025?

The US solar industry installed 10.8 gigawatts-direct current (GWdc) of capacity in the first quarter of 2025. Despite both a quarterly and annual decline in capacity, Q1 2025 was the industry's fourth-best quarter. The utility-scale segment followed a similar trend, with 9 GWdc of capacity, which is lower than both Q1 2024 and Q4 2024.

<div class="df_qntext">How much will the US solar industry contract in 2025?

The US solar industry is projected to contract by 2% annually between 2025 and 2030 in our Base case but still add nearly 43 GWdc on average each year. In the near term, solar installations will decline at an average rate of 7% from 2025 to 2027.

<div class="df_qntext">What will energy storage be like in 2024?

In 2024, the global energy storage is set to add more than 100 gigawatt-hours of capacity for the first time. The uptick will be largely driven by the growth in China, which will once again be the largest energy storage market globally.

From the standpoint of load-storage collaboration of the source grid, this paper aims at zero carbon green energy transformation of big data industrial parks and proposes three types of energy storage ...
