National development solar container entity credit

<div class="df_qntext">When does a solar project qualify for a tax credit?
Solar projects must be placed in service by the end of 2027to qualify for the tax credit,with an exception for projects that start construction by July 4,2026,enabling those projects to be placed in service within 4 years. This is why many companies have already safe harbored projects via purchasing transformers or solar modules.

<div class="df_qntext">Are clean electricity production credits available to foreign entities?
Clean Electricity Production Credit and Clean Electricity Investment Credit are unavailableto specified foreign entities and foreign-influenced entities. Zero Emission Nuclear Power Production Credit (45U) is unavailable to specified foreign entities; eligibility ends for foreign-influenced entities two years after enactment.

<div class="df_qntext">Are solar project developers getting hit with a major policy curveball?
Solar project developers just got hit with a major policy curveball. President Trump signed the "One Big Beautiful Bill" into law on July 4,and buried in this sweeping legislation are some of the strictest foreign entity restrictions we've ever seen for renewable energy tax credits.

<div class="df_qntext">When do energy storage credits expire?
Be placed in service by December 31, 2027, to remain eligible for the Clean Electricity Production or Clean Electricity Investment credits before those credits are phased out. These new deadlines do not apply to energy storage technologies, including those placed in service at wind or solar facilities, or certain other qualified technologies.

<div class="df_qntext">Do commercial solar projects lose tax credits?
For most commercial solar projects, this means if a PFE provides significant equipment, financing, or technical support, you could lose your Investment Tax Credit (ITC) or Production Tax Credit (PTC) entirely. When Do FEOC Rules Take Effect for Commercial Solar Projects?

<div class="df_qntext">Will new feoc rules eliminate 40-50% of commercial solar tax credits?
TL;DR: New FEOC rules from the "One Big Beautiful Bill" could eliminate 40-50%of your commercial solar tax credits if you use equipment from Chinese,Russian,Iranian,or North Korean companies. Projects starting construction after December 31,2025 face the strictest restrictions,with compliance thresholds increasing annually through 2030.
