

Oslo port city industrial park solar container subsidy policy

Does Oslo have a zero-emissions port?

Emissions Free Local Ferries

How can Oslo be a sustainable port?

Port of Oslo will achieve sustainable growth while increasing port calls, and cargo and passenger volumes without contributing to more greenhouse gas or local air emissions. Basic Principles: 1. Be a driving force to develop a port of the future. Develop in accordance with Oslo's zero-emissions vision and established cost-benefit principles.

How has the port of Oslo reduced its emissions?

Port of Oslo has reduced its emissions from port-owned vessels and vehicles from 230 tonnes in 2015 to 2.8 tonnes in 2020 by phasing out vehicles powered by fossil fuels, and investing in electric vehicles. Port vessels and vehicles stopped using fossil fuels in 2019.

Does Oslo have a zero-emissions port?

Ports and shipping account for 3% of Oslo's greenhouse gas emissions. Port of Oslo's vision is to become the world's most environmentally friendly urban port. The plan for a zero-emissions port was established and approved by Oslo City Council in 2018. Implementation of the plan is underway.

Why is Oslo a good port?

The port's most important environmental measure is to help shift traffic from road to sea. Therefore, Port of Oslo is planning for a 50% increase in cargo and a 40% increase in passenger traffic by 2034. The largest discharges in the port are from ships.
