<div class="df\_qntext">What are the maintenance strategies for solar PV systems?

In literature, three general maintenance strategies for solar PV systems are mentioned: corrective, preventive, and predictive maintenance. Fig. 8 shows the evolution of maintenance strategies over time, along with examples of maintenance activities for PV systems. Fig. 8. Evolution of maintenance strategies.

<div class="df\_qntext">Do photovoltaic systems need maintenance?

The expansion of photovoltaic systems emphasizes the crucial requirement for effective operations and maintenance, drawing insights from advanced maintenance approaches evident in the wind industry. This review systematically explores the existing literature on the management of photovoltaic operation and maintenance.

<div class="df\_qntext">Why is maintenance important in PV systems?

The importance of maintenance in PV systems has garnered significant interest, prompting research and initiatives from various institutions to establish "best practices" for the O&M of PV systems .

<div class="df\_qntext">What are gaps and future research directions for PV O&M management?

Gaps and future research directions for PV O&M management are proposed. The expansion of photovoltaic systems emphasizes the crucial requirement for effective operations and maintenance, drawing insights from advanced maintenance approaches evident in the wind industry.

<div class="df\_qntext">How a solar PV asset owner & O&M service provider can benefit?

o Synergies of solar PV Asset Owners and O&M service providers, with innovators in supply chain / reverse logistics technologies, also leveraging AI/machine learning aided logistics, sorting, warehouse operations, inventory management for circular solar PV economy.

<div class="df\_qntext">Who should manage the design of a solar PV power plant?

Management of change If the design of a solar PV power plant needs to be adjusted after the Commercial Operation Date, the O&M service providers should, as a best practice, be involved by the Asset Owner and the EPC service provider. They can even be a main contributor, if not the leader, of this change process.
