The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

<div class="df_qntext">How does a solar combiner box work?

Solar combiners are designed to work with either AC or DC power, but never both simultaneously. There are fuse terminals inside the box. Solar strings connect to the terminals, and their output is then transferred to a single cable to go to the inverter box. Is a Solar Combiner Box Necessary?

<div class="df_qntext">What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.
