

Shared solar container capacity lease agreement

<div class="df_qntext">What is a solar lease agreement?

This agreement is for leasing solar systems to residential customers and meant to be used by vertically integrated companies who finance and install systems. This residential lease agreement is created for companies that work with a network of third-party installation partners or financiers.

<div class="df_qntext">Why are solar & battery storage lease rates increasing?

The increasing demand for land suitable for solar and battery storage projects has driven up lease rates in recent years, especially because of the incentives offered by the IRA Renewable Energy. As the industry expands, competition for land is intensifying, particularly in regions with favorable solar and wind resources.

<div class="df_qntext">What is the difference between a PPA and a solar lease agreement?

In a PPA, you buy the net amount of solar power you use from the meter at a fixed rate per kWh. However, with a solar lease agreement, you generally pay a fixed monthly amount. That monthly amount allows you to use all the output energy the solar equipment generates.

<div class="df_qntext">What is the average lease rate for solar projects?

Recent research by Purdue University revealed that the average lease rate for solar projects has exceeded \$1,000 per acre in many regions. With the growing interest in BESS projects, it's reasonable to expect similar trends in land lease rates for battery storage facilities.

<div class="df_qntext">How do I resolve a dispute with a solar lease agreement?

If there is any dispute regarding the solar lease agreement, the parties agree to resolve the dispute within 30 days using mutual discussion. Should the parties not achieve a satisfactory resolution, it will be settled through arbitration. Add information about the case and your company or situation.

<div class="df_qntext">How much does a solar project cost per acre?

As the industry expands, competition for land is intensifying, particularly in regions with favorable solar and wind resources. Recent research by Purdue University revealed that the average lease rate for solar projects has exceeded \$1,000 per acre in many regions.
