

<div class="df_qntext">When should a battery energy storage system be inspected?

Sinovoltaics advice: we suggest having the logistics company come inspect your Battery Energy Storage System at the end of manufacturing, in order for them to get accustomed to the BESS design and anticipate potential roadblocks that could delay the shipping procedure of the Energy Storage System.

<div class="df_qntext">Do battery energy storage systems look like containers?

C. Container transportation Even though Battery Energy Storage Systems look like containers, they might not be shipped as is, as the logistics company procedures are constraining and heavily standardized. BESS from selection to commissioning: best practices³⁸ Firstly, ensure that your Battery Energy Storage System dimensions are standard.

<div class="df_qntext">How to check ancillary components of solar energy system?

In order to verify the functionalities of the ancillary components of the solar energy system a functional check will be performed. Measure the load voltage transducer and load current transducer output current (4-20mA) in the control box and compare with the actual battery voltage and actual battery current.
