

# Solar container displays new equipment outdoors

<div class="df\_qntext">What is a mobile solar container?

The Austrian energy company SolarCont has developed a mobile solar container that stores foldable photovoltaic panels for portable green energy anywhere.

<div class="df\_qntext">What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

<div class="df\_qntext">How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

<div class="df\_qntext">How mobile solar containers can be transported?

The solar panels' rail system and folding mechanism are fixed on a sturdy floor frame. This configuration makes it simple to transfer the mobile solar containers by trucks, trains, and cargo ships. Foldable, mobile, compact, and modularized. Mobile solar containers can be compactly stored and easily transported to different locations.

<div class="df\_qntext">What is solarcont & how does it work?

solarcont has developed a mobile solar container that stores and unrolls foldable photovoltaic panels for portable green energy anywhere.

<div class="df\_qntext">Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms, vandalism, and all kinds of possible threats. Mobile solar containers application visuals.

SolaraBox Mobile Solar Containers: deliver 400-670 kWh/day with foldable solar arrays. Rapid-deploy, modular, rugged, and certified for off-grid, on-grid, or hybrid solutions.

The solar container can be used for short-term use at events, for longer use, for example over the summer months, or as a long-term solution. To cover the wide range of requirements, we make a ...
