

# Solar container industry sales commission system

<div class="df\_qntext">Do solar salespeople earn commission?

Except in rare sales positions, earning commission has been an expected part of the job. Having skin in the game provides the incentive people need to act with urgency and land new deals. I. Solar Commission Structures: How you pay your solar salespeople matters! I.I. 1. Overall contract price I.II. 2. Percentage of margin I.III. 3.

<div class="df\_qntext">How do solar salespeople get paid?

The majority of solar salespeople are paid on a straight commission pay structure without a base salary. Their commission structure can be a lot more complicated than canvassers and territory managers because their overall sales compensation is based on several different commission calculation methods. These methods include:

<div class="df\_qntext">How does a solar sales team work?

To help drive the sale of solar-powered systems, it is standard for companies in the solar energy industry to structure employee pay around commissions. Similar to many other sales-oriented industries, sales teams are composed of different supporting roles that work collaboratively to close deals.

<div class="df\_qntext">What types of employees are paid commissions in the solar sales industry?

There are three main employee types that are paid commissions in the solar sales industry. These include: Canvassers: While not directly involved in coordinating sales or transactions, canvassers help with all of the backend work such as lead generation, customer prospecting, and scheduling appointments for sales reps.

<div class="df\_qntext">How do solar companies calculate commission rates?

Therefore, some solar companies calculate their base commission rate on the average solar system size and cost to install the system. Then, they'll couple this base rate with incentive multipliers to encourage better-than-average sales. Say your average system size is 6kW, and your average installation cost per watt is \$3.00.

<div class="df\_qntext">How much does a high-margin Solar System cost?

You may consider bundling groups of these high-margin products together into separate sales commission percentages. In practice: Elise sells a 6kW solar-plus-DC-coupled battery system for \$30,000, qualifying for an 8% base commission instead of 5% for the solar installation alone. She pockets \$2,400.

Seeking trusted container suppliers in China? As a leading container factory & exporter, we specialize in custom shipping containers and energy storage containers. Get expert solutions from a professional ...
