

<div class="df_qntext">What is the Institute of solar research?

The research centre brings together specialists from various disciplines and nations. Together, they are driven by the vision of making a significant contribution to a sustainable energy supply. The Institute of Solar Research develops concentrating solar systems for the generation of heat, power and fuel.

<div class="df_qntext">What happened to the Institutes of future fuels & solar research in Jülich?

The new premises of the Institutes of Future Fuels and Solar Research in Jülich were officially opened at a ceremony attended by numerous guests from politics, local companies and DLR. 13 months of construction work have now come to an end and the relocation of the two institutes to the modern office building is now in its final phase.

<div class="df_qntext">Are farmers open to large-scale solar projects?

FOR IMMEDIATE RELEASE WASHINGTON, DC -- Over 70% of farmers are open to large-scale solar projects on their properties if system designs allow for continued agricultural production, according to a report released today by the Solar and Storage Industries Institute

<div class="df_qntext">What is Itri's 2035 technology strategy & roadmap?

To remain at the forefront of innovation and address global challenges, ITRI has launched its 2035 Technology Strategy & Roadmap. This strategy aims to enhance intelligentization enabling technologies and focus on four application domains: Smart Living, Quality Health, Sustainable Environment, and Resilient Society.

<div class="df_qntext">What is solar technology & applications?

Behind solar cells lies a complex technology. Within the expert group Solar Technologies & Applications, we develop and industrialise technology for manufacturing and integration of thin-film solar cells. Inhoud wordt niet getoond omdat functionele cookies niet toegestaan zijn.

<div class="df_qntext">What are thin-film solar cells?

New technologies make integration of solar cells into buildings and infrastructure affordable. Thin-film solar cells (see image) are cells that are built up but placed directly onto a rigid or flexible carrier using various deposition techniques. This offers freedom of design and integration, of form, dimension, and electrical design.

The Solar Container Power Systems market is poised for steady growth, fueled by advancements in technology and a strong shift towards sustainability across key industries.

The research team is based on the Green Energy and Environment Research Laboratories (GEL) of the Industrial Technology Research Institute (ITRI), in cooperation with a ...

Solar container industry technology research institute

Machinery & Equipment A new research document titled, Global Solar Container market study is released by HTF MI. The study is an exploratory attempt to understand the industry ...

Because of the increasing demands in clean energy, the solar energy industry is one of the fastest growing forces in the market. Nowadays there are several major directions for solar technology ...

To speed up the progress of the nation's energy availability, the Energy and Mining Research/Service Organization (EMRO) of the Industrial Technology Research Institute (ITRI) has ...

The institute also actively collaborates with industry partners, government agencies, and international research institutions to foster knowledge exchange, facilitate technology transfer, ...
