th MCS 012 Clause 7.7.2 sub-paragraph b). 3.3.2 Section 5.13.2 in the Code of Practice (Figure 5.7 option d)) allows for the system designer to spe ify if the array frame requires earthing. Where the decision is taken by the system designer to not provide either protective or functional

<div class="df_qntext">How many inverters can be connected to a MV station?

The Inverter Manager and the I/O Box can be installed in the MV Station as an option and can control the output of the inverters. Up to 42 inverters can be connected to one Inverter Manager. This means that PV systems can be designed with several MV stations, whereby not every MV station has to be fitted with an Inverter Manager.

<div class="df_qntext">How many Sunny Tripower inverters can be connected to the MV station?

Up to 30 Sunny Tripower inverters can be connected to the MV Station. Several MV Stations can be connected together to form a ring or string on the medium-voltage side. The Inverter Manager and the I/O Box can be installed in the MV Station as an option and can control the output of the inverters.
