<div class="df_qntext">What is a mobile solar container?

The Austrian energy company SolarCont has developed a mobile solar container that stores foldable photovoltaic panels for portable green energy anywhere.

<div class="df_qntext">What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

<div class="df_qntext">What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

<div class="df_qntext">How many solar panels can be installed in a solarcontainer?

The unfolded panels can reach up to 120 meters in length, and there are 240 solar panels that can be installed. The Solarcontainer is a mobile system that can be used for both on- and off-grid purposes, including rescue missions and gatherings. The foldable photovoltaic panels are tucked inside a mobile solar container.

<div class="df_qntext">How a mobile solar container can be transported?

This setup enables easy transport of the mobile solar container via cargo ship, vessels, trains, and trucks, given that the rail system can be stashed until it fits the container's frame. The unfolded panels can reach up to 120 meters in length, and around 240 solar panels can be installed.
