

# Solar container subsidy tax deduction

<div class="df\_qntext">What is the small-scale investment deduction (Kia)?

The Small-scale investment deduction (KIA) is a tax scheme for entrepreneurs who invest in business assets such as solar carports, solar panels or a battery storage system. By using the KIA, you can save up to 28% of your investment extra deducted from your profit.

<div class="df\_qntext">What is Sde++ subsidy?

The scheme reimburses the difference between the cost price of renewable energy and the market value of the electricity supplied. For many business solar projects, SDE++ is an important financial support. It lowers the payback period and makes larger installations feasible. What is the SDE++ subsidy? The SDE++ is an operating subsidy.

<div class="df\_qntext">Can I claim Capital Allowances if I buy energy efficient technology?

You can claim capital allowances when you buy energy efficient, or low or zero-carbon technology for your business. This reduces the amount of tax you pay. Find out about green taxes for businesses - tax relief for becoming more energy efficient and schemes for off-setting your environmental impact.

<div class="df\_qntext">Where can I find information on the SDE++ subsidy?

Check the RVO website for more information on the SDE++ subsidy. The latest round of openings ran from 10 September to 10 October 2024. For 2025, there is still no new round of openings announced. Once the new period is set by the Ministry of Economic Affairs and Climate, the Rijksdienst voor Ondernemend Nederland (RVO) will publish it.

<div class="df\_qntext">Do I receive a subsidy if I feed back to the grid?

You only receive a subsidy for the electricity you feed back to the grid. For own consumption, a higher correction amount applies, reducing the subsidy amount. The correction amount is the amount the government expects you to receive per kWh on the market. The higher this amount, the lower the subsidy you will receive per kWh.
