<div class="df\_qntext">What is a solarcontainer?

Solarcontainer explained: What are mobile solar systems? The Solarcontainer represents a grid-independent solution as a mobile solar plant. Especially in remote areas it can guarantee a stable energy supply or support or almost replace a public grid with strong power fluctuations, as well as diesel generators that are used.

<div class="df\_qntext">How is a solar container lifted?

The solar container is lifted using the corner corners in the roof frame. With these in the base frame,the module can be fixed and secured during transport using the twist-lock system. The solar rail system consists of individual segments that are used during construction connected to the fixed,centrally arranged container floor.
