<div class="df_qntext">How do you use a space corner cabinet?

Use every inch of storage space available in corners with the SPACE CORNER cabinet. Use narrow cabinets and don't waste an inch of storage space. Blum's locking system adds an extra layer of security to fine furniture. The easy and fast way to assemble drawers and pull-outs.

<div class="df_qntext">How do I Make my Kitchen cabinets more space?

In the case of kitchen cabinets, this can be as easy as changing the layout of the shelving that's already in there. You can usually move shelves around which can immediately give you more (or less) space where you need it the most. This can give you extra space to use more of the following ideas (always a bonus!). Hope it helps!

<div class="df_qntext">Should shelves go to the edge of a cupboard?

If the shelves go to the edge of the cupboard, you COULD still have storage on the doors, but you would need to have things that missed the shelves completely (small baskets for example) A simple over the door rack can be hung, and this doesn't involve any drilling or holes so is perfect if you need to consider that.

<div class="df_qntext">Can a staggered storage unit fit under a stairway?

The TROFAST staggered storage unit seems made for the design of a stairway. It fits comfortably under the stairs and can transform unused space into plentiful storage. If your storage space under the stairs is behind a closed door, use the TROFAST like Maastricht did.

<div class="df_qntext">Is shelf space too high in kitchen cupboards?

Shelf space is usually far too high in kitchen cupboards - as they want you to be able to store a variety of shaped objects in them. However - for most of us, this means a lot of wasted space. SO - it makes perfect sense to use the space UNDER shelves as well! So simple to just slide onto a shelf, and you can store loads in them.

<div class="df_qntext">Can I use drawers under stairs?

Drawers are a great idea for the odd triangle-shaped storage space under the stairs. IKEA kitchen cabinets allow you to mix different lengths, widths, and heights to get the right combination to fit the sloped space.
