<div class="df_qntext">Are battery storage systems a good alternative to diesel and CHP?

While renewable power generators are often the lowest-cost alternative to diesel and CHP plants, they do have one major disadvantage: if there is no wind, or during darkness, wind power and solar generators are unable to provide electricity. This is where battery storage systems offer a simple solution.

<div class="df_qntext">How does a battery storage system work?

If more power is produced than is needed, it is stored in the battery. As soon as more power is required than can be provided by the sun, the storage system goes into operation and provides continuous power. Battery storage systems help to cut costs, including when they're combined with a diesel generator.

<div class="df_qntext">How does energy storage work?

The energy storage system charges up in times of low grid loads and provides power at peak times to relieve the grid load and ensure custom grid fees.
