

Talent shortage directory in solar container industry

As we move into April 2025, the talent shortage facing sectors like manufacturing, chemicals, and facilities management isn't just an issue--it's becoming a crisis. With the demand for ...

Talent management (TM) is a critical aspect of organizational success, particularly in industries characterized by constant change and intense competition, such as the Turkish container shipping ...

A shortage of at least 300,000 skilled workers by 2030 looms over Germany as demand for jobs in the country's renewable energy industry sector rises, according to an analysis ...

Two years later, that forecast still holds. But key industry trends continue to compound the talent challenge as the industry races toward \$1 trillion in revenue by 2030, according ...

Achieving climate goals....can we attract the skills and people needed to propel forward the renewable transition? Employment in the European solar industry rose by some 30% in 2022 to around 600,000, ...

This shortage is already visible on the ground. O& M companies are struggling to fill vacancies, even in regions with a high concentration of solar facilities. As a result, they often rely on subcontracted labor, ...
