

Taxes for new solar container projects

<div class="df_qntext">Do you pay VAT on solar panels?

Then you do not pay VAT (in Dutch) for the solar panels, parts, and installation. You use part of the electricity generated by your solar panels yourself. What remains, you feed back to the electricity grid. If you feed more back than you use, you will receive compensation from your energy supplier.

<div class="df_qntext">Will tax change in 2025?

As things stand, 2025 will mark the year that the world is inevitably moving forward with sustainable development and the landscape of tax is changing alongside it. With a wide diversity of initiatives on regional, national and international levels, it is a major step forward in creating a more sustainable business environment.

<div class="df_qntext">What is the new BPM tax in 2025?

Previously exempt, the BPM (tax on passenger cars and motorcycles) for company vans and small trucks have been abolished in 2025. The rate will be based on CO₂-emission, if the levels are unknown the tax authority will set the emission at 330 gr/km. The rate is set at EUR74,41 per gr/km.

<div class="df_qntext">What tax measures will be introduced in July 2025?

Starting July 2025, new tax measures targeting sectors such as packaging (plastic), diesel fuel usage, and air travel will be implemented to discourage environmentally harmful practices. These measures include an incremental levy on single-use plastics and a diesel fuel surcharge that will increase by 5% annually until 2028.

<div class="df_qntext">How will air travel be taxed in 2024?

These measures include an incremental levy on single-use plastics and a diesel fuel surcharge that will increase by 5% annually until 2028. Moreover, starting August 2024, air travel will incur an additional environmental tax of EUR29,40 per outgoing traveller.
