

# The best business model for solar container

<div class="df\_qntext">How can a market-centric business model help solar PV companies?

The disruptive nature of solar PV technology, limited awareness and high financial requirements often make solar PV disadvantaged compared with its competition. A market-centric business model can help solar PV companies address consumers' concerns while offering solutions to enhance its adoption.

<div class="df\_qntext">What makes a good solar PV vendor?

For vendor companies involved in solar PV sales and installation, entry to the market is generally not restricted by requirements of substantial initial capital, research and development capabilities, huge infrastructural needs or a sizeable workforce.

<div class="df\_qntext">Should solar PV companies use social media?

Digital and social media platforms offer an excellent opportunity for solar PV companies to increase their market reach without excessive financial burden. Social media is increasingly used to market products and could serve as an ideal medium for solar PV companies.

<div class="df\_qntext">How can solar PV companies transform customer interactions and engagement?

Solar PV companies can transform their customer interactions and engagement practices on multiple fronts. The first suggestion concerns the diversification of channels to market the technology.

<div class="df\_qntext">How do business models for PV companies differ from other countries?

First, the research was carried out in Finland. Although the context offers empirically rich and unique case material to study business models for PV companies, socioeconomic considerations, demographic factors, market dynamics and regulatory regimes may differ significantly from within other countries.

<div class="df\_qntext">How can a company promote solar PV technology?

The solar photovoltaic (PV) companies involved in the sales of PV systems are central to fostering diffusion. A company's ability to devise and deliver value offerings that match customers' needs is vital in encouraging the adoption of solar PV technology.
