

Toshiba high voltage switch solar container

<div class="df_qntext">What is a Toshiba load switch IC?

Toshiba load switch ICs employ a foldback-type protection circuit control system, which contributes to safety design. The overvoltage protection function of the load switch IC is for protecting the IC and circuit in subsequent stages by turning off the output when the input voltage exceeds the overvoltage protection threshold voltage.

<div class="df_qntext">Why is Toshiba upgrading transformer capacity & voltage?

To deal with the growing demand of electric power and various requirements, Toshiba will continue to upgrade transformer capacity and its voltage with latest advanced technology.

<div class="df_qntext">What substation equipment does Toshiba provide?

Toshiba has supplied various substation equipment, such as switchgears, transformers, and surge arresters. These equipment are manufactured with the state of the art technology and received high reputation by the customers around the world.

<div class="df_qntext">What is a solar container?

The Solar container is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

<div class="df_qntext">How many GIS stations does Toshiba provide?

Since 1969, Toshiba have supplied GIS globally to more than 900 GIS stations with over 6,000 units covering voltages from 72kV to 1100kV. Toshiba Transmission & Distribution system offer total solutions to create safe, secure and comfortable systems with wide-range reliable Toshiba products.

<div class="df_qntext">Will Toshiba contribute to climate-neutrality by 2050?

Toshiba will contribute to climate-neutrality by 2050 with innovative natural-origin gas solutions for power grids. ? AEROXIA = " AERO " (Natural-origin gas) + " AXIA " (Value) Gas insulated switchgears (GIS) requires far less space than air break switches.
