How much does a solar inverter cost?

You won't be able to use the electricity generated by your solar panels without a solar inverter. A solar inverter costs \$2,000 on average, with prices ranging from \$800 to \$5,000--though the overall price is wrapped up in your solar panel installation. The size of your system, the type of inverter, and the efficiency rating affect your final cost.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

How much does a microinverter cost?

Microinverters cost an average of \$150 to \$300 each, but you'll need one for each solar panel in your system. They're installed on the underside of each panel and immediately convert electricity as soon as it's generated, helping increase efficiency by limiting energy loss. Microinverters are popular because they perform well in areas with shade.
